About This Guide

This document provides release-specific information for Creo.JS for Creo Parametric 7.0. It describes new methods and properties in Creo.JS and also includes critical functions that require investigation of existing applications and adjustment of existing code.

Documentation for Creo.JS

Creo.JS documentation comes in the following forms:

- API Wizard in HTML format
- *Creo.JS User's Guide* in PDF format
- **Reference Documents** page at <http://www.ptc.com/appserver/cs/doc/refdoc.jsp>

(Choose the product or document type)

The API Wizard and the *Creo.JS User's Guide* are on the Creo Parametric DVD-ROM. You can view the API Wizard with your Internet browser. To view and print the PDF book, you must have Acrobat Reader installed. PTC welcomes your suggestions and comments on its documentation. Send comments electronically to:

MCAD-documentation@ptc.com

Technical Summary of Changes

New Functions	7
Miscellaneous Technical Changes	8

This chapter describes the critical and miscellaneous technical changes in Creo Parametric 7.0.0.0 and Creo.JS. It also lists the new and superseded functions for this release.

New Functions

This section describes new functions for Creo.JS for Creo Parametric 7.0.0.0.

Drawings

New Function	Description
pfcGeneralViewCreateInstructions. ViewScale	Assigns a scale to the created general drawing view. This value is optional, if not assigned, the default drawing scale is used.

Materials

New Function	Description
pfcMaterial.FluidMaterialType	Sets the material type for the fluid properties of the material.

Solid Bodies

New Function	Description
pfcSolidBody.GetBodyState()	Specifies the state of the body using the enumerated data type <code>EpfcSolidBodyState</code> .
pfcSolidBody.IsConstruction()	Checks if the body is a construction body.
pfcSolidBody.ListSurfaces()	Lists all the surfaces in the specified body.
pfcSolid.GetDefaultBody()	Returns the default body in the specified solid.
pfcSolidBody.GetFeatures()	Lists the features that are associated with the specified body.
pfcSolid.GetSurfaceSolidBody()	Returns the body to which the surface belongs.
pfcSolid.GetEdgeSolidBody()	Returns the body to which the edge belongs.
pfcSolidBody.GetOutline()	Retrieves the regeneration outline of a solid body, with respect to the base coordinate system orientation.
pfcSolidBody.IsSheetmetal()	Checks if the specified body is an

New Function	Description
	active sheetmetal body.
<code>pfcSolidBody.GetDensity()</code>	Determines the density of the body.
<code>pfcSolidBody.GetMassProperty()</code>	Returns the mass properties of a body in the specified coordinate system.

Miscellaneous Technical Changes

The following changes in Creo Parametric 7.0.0.0 can affect the functional behavior of Creo.JS. PTC does not anticipate that these changes cause critical issues with existing Creo.JS applications.

Support for Automatic Representation

The value `SIMPREP_AUTO` is added to the enumerated data type `pfcSimpRepActionType` which indicates the use of automatic representation of the component

Support for Fluid as Material Type

The value `MTL_FLUID` is added to the enumerated data type `pfcMaterialType` which indicates geometric bodies can now have material type as fluid.

Change in behavior of the property `pfcFeature.FeatType`

Earlier the property `pfcFeature.FeatType` returned the error `pfcXInvalidEnumValue` for Belt feature. In Creo Parametric 7.0.0.0 and later, this behavior is fixed. To support the Belt feature in the Creo.JS application, the following enumerated types are updated with the new values:

- `pfcComponentConstraintType`
 - `ASM_CONSTRAINT_EXPLICIT`
- `pfcFeatureType`
 - `FEAT_HULL_BLOCK`
 - `FEAT_HULL_BLOCK_DEF`
 - `FEAT_PM_BELT`

2

Technical Summary of Changes for Creo 7.0.1.0

New Functions	10
---------------------	----

This chapter describes the critical and miscellaneous technical changes in Creo Parametric 7.0.1.0 and Creo.JS. It also lists the new and superseded functions for this release.

New Functions

This section describes new functions for Creo.JS for Creo Parametric 7.0.1.0.

Assembly

New Function	Description
<code>pfcComponentFeat. GetConstraintsWithCompPath()</code>	Retrieves the constraints for a given assembly component using the component path.

3

Technical Summary of Changes for Creo 7.0.2.0

Critical Technical Changes	12
New Functions	12

This chapter discusses the critical and miscellaneous technical changes in Creo Parametric 7.0.2.0 and Creo.JS. It also lists the new and superseded functions for this release.

Critical Technical Changes

This section discusses the changes in Creo Parametric 7.0.2.0 and Creo.JS, which might require modification of existing Creo.JS applications.

Debugging Creo.JS Code using Chrome DevTools

In Creo Parametric 7.0.2.0 and later, you can debug JavaScript by using Chrome DevTools. The Creo.JS toolkit uses a Chrome V8 JavaScript engine that runs within the Creo process and supports the standard Chrome Dev Tools protocol. This process enables you to use the remote debugger through the DevTools provided by the Chrome web browser.

New Functions

This section discusses new functions for Creo.JS for Creo Parametric 7.0.2.0.

Interface

New Function	Description
pfcBaseSession.ExportProfileLoad()	Loads the specified profile for export.

Solids

New Function	Description
pfcSolid.GetMassPropertyWithDensity() ()	Calculates the mass properties of a part or an assembly in the specified coordinate system.
pfcRegenInstructions. ResolveModeRegen	Enables regeneration of a solid in resolve mode.

4

Technical Summary of Changes for Creo 7.0.3.0

New Functions	14
---------------------	----

This chapter discusses the critical and miscellaneous technical changes in Creo Parametric 7.0.3.0 and Creo.JS. It also lists the new and superseded functions for this release.

New Functions

This section discusses new functions for Creo.JS forCreo Parametric 7.0.3.0.

Features

New Function	Description
<code>pfcFeature.GroupDirectHeader</code>	Retrieves the direct header of the group.

5

Technical Summary of Changes for Creo 7.0.4.0

New Functions	16
---------------------	----

This chapter discusses the critical and miscellaneous technical changes in Creo Parametric 7.0.4.0 and Creo.JS. It also lists the new and superseded functions for this release.

New Functions

This section discusses new functions for Creo.JS forCreo Parametric 7.0.4.0.

Graphics

New Function	Description
pfcMakeMatrixOrthonormal()	Converts a non-orthonormal matrix to an orthonormal matrix with the specified scaling factor.

Solid

New Function	Description
pfcAssembly. GetMassPropertyByCompPath()	Calculates the mass properties of a solid that is referenced by the specified coordinate system selection, using the respective component paths.

6

Technical Summary of Changes for Creo 7.0.6.0

Miscellaneous Technical Changes	18
---------------------------------------	----

This chapter describes the critical and miscellaneous technical changes in Creo Parametric 7.0.6.0 and Creo.JS. It also lists the new and superseded functions for this release.

Miscellaneous Technical Changes

The following changes in Creo 7.0.6.0 can affect the functional behavior of Creo.JS. PTC does not anticipate that these changes cause critical issues with existing Creo.JS applications.

Support for Spline Surfaces with 2 Derivatives

The value `SURFACE_SPL2DER` is added to the enumerated data type `pfcSurfaceType`, which provides support for spline surfaces with 2 derivatives.

Support for Datum Curve End in Attachment Selection

The value `ITEM_CRV_START` and `ITEM_CRV_END` is added to the enumerated data type `pfcModelItemType`, which supports selection of specific dimension attachment.

7

Technical Summary of Changes for Creo 8.0.0.0

Critical Technical Changes	20
New Functions	20

This chapter describes the critical and miscellaneous technical changes in Creo Parametric 8.0.0.0 and Creo.JS. It also lists the new and superseded functions for this release.

Critical Technical Changes

This section discusses the changes in Creo Parametric 8.0.0.0 and Creo.JS, which might require modification of existing Creo.JS applications.

Debugging Creo.JS Code using Chrome DevTools

You can debug JavaScript by using Chrome DevTools. The Creo.JS toolkit uses a Chrome V8 JavaScript engine that runs within the Creo process and supports the standard Chrome Dev Tools protocol. This process enables you to use the remote debugger through the DevTools provided by the Chrome web browser.

New Functions

This section describes new functions for Creo.JS for Creo Parametric 8.0.0.0.

Features

New Function	Description
pfcFeature.GroupDirectHeader	Retrieves the direct header of the group.

Graphics

New Function	Description
pfcMakeMatrixOrthonormal()	Converts a non-orthonormal matrix to an orthonormal matrix with the specified scaling factor.

Interface

New Function	Description
pfcBaseSession.ExportProfileLoad()	Loads the specified profile for export.

Solids

New Function	Description
pfcSolid.GetMassPropertyWithDensity() ()	Calculates the mass properties of a part or an assembly in the specified coordinate system.
pfcRegenInstructions. ResolveModeRegen	Enables regeneration of a solid in resolve mode.

8

Technical Summary of Changes for Creo 8.0.1.0

Critical Technical Changes	23
New Functions	23

This chapter describes the critical and miscellaneous technical changes in Creo Parametric 8.0.1.0 and Creo.JS. It also lists the new and superseded functions for this release.

Critical Technical Changes

This section discusses the changes in Creo Parametric 8.0.1.0 and Creo.JS, which might require modification of existing Creo.JS applications.

New Functions

This section describes new functions for Creo.JS for Creo Parametric 8.0.1.0.

Solids

New Function	Description
pfcAssembly. GetMassPropertyByCompPath()	Calculates the mass properties of a solid that is referenced by the specified coordinate system selection, using the respective component paths.

9

Technical Summary of Changes for Creo 8.0.2.0

Miscellaneous Technical Changes	25
---------------------------------------	----

This chapter describes the critical and miscellaneous technical changes in Creo Parametric 8.0.2.0 and Creo.JS. It also lists the new and superseded functions for this release.

Miscellaneous Technical Changes

The following changes in Creo 8.0.2.0 can affect the functional behavior of Creo.JS. PTC does not anticipate that these changes cause critical issues with existing Creo.JS applications.

Support for Spline Surfaces with 2 Derivatives

The value `SURFACE_SPL2DER` is added to the enumerated data type `pfcSurfaceType`, which provides support for spline surfaces with 2 derivatives.

10

Technical Summary of Changes for Creo 8.0.3.0

New Functions	27
Miscellaneous Technical Changes	27
Full Version of Creo® Parametric Creo.JS Release Notes	27

This chapter describes the critical and miscellaneous technical changes in Creo Parametric 8.0.3.0 and Creo.JS. It also lists the new and superseded functions for this release.

New Functions

This section describes new functions for Creo.JS for Creo Parametric 8.0.3.0.

Action Listeners

New Function	Description
<code>pfcSelectionBufferListener.OnAfterSelBufferChange()</code>	This method is called after the selection buffer is changed. This method is available by calling the method <code>pfcActionSource.AddActionListenerWithType</code> with the value of the notify type as <code>pfcSELBUFFER_CHANGE_POST</code> .

Miscellaneous Technical Changes

The following changes in Creo 8.0.3.0 can affect the functional behavior of Creo.JS. PTC does not anticipate that these changes cause critical issues with existing Creo.JS applications.

Support for Datum Curve End in Attachment Selection

The value `ITEM_CRV_START` and `ITEM_CRV_END` is added to the enumerated data type `pfcModelItemType`, which supports selection of specific dimension attachment.

Full Version of Creo® Parametric Creo.JS Release Notes

To see a full version of the *Creo® Parametric Creo.JS Release Notes*, visit the page [Creo® Parametric Creo.JS Release Notes](#). The full version contains information from all the past release notes for Creo.JS.

11

Technical Summary of Changes for Creo 9.0.0.0

New Functions	29
Miscellaneous Technical Changes	29

This chapter describes the critical and miscellaneous technical changes in Creo Parametric 9.0.0.0 and Creo.JS. It also lists the new and superseded functions for this release.

New Functions

This section describes new functions for Creo.JS for Creo Parametric 9.0.0.0.

Action Listeners

New Function	Description
<code>pfcSelectionBufferListener.OnAfterSelBufferChange()</code>	This method is called after the selection buffer is changed. This method is available by calling the method <code>pfcActionSource.AddActionListenerWithType</code> with the value of the notify type as <code>pfcSELBUFFER_CHANGE_POST</code> .

Miscellaneous Technical Changes

The following changes in Creo 9.0.0.0 can affect the functional behavior of Creo.JS. PTC does not anticipate that these changes cause critical issues with existing Creo.JS applications.

Support for Spline Surfaces with 2 Derivatives

The value `SURFACE_SPL2DER` is added to the enumerated data type `pfcSurfaceType`, which provides support for spline surfaces with 2 derivatives.

Support for Datum Curve End in Attachment Selection

The value `ITEM_CRV_START` and `ITEM_CRV_END` is added to the enumerated data type `pfcModelItemType`, which supports selection of specific dimension attachment.

Obsolete Function

In Creo Parametric 9.0.0.0 and later, the property `pfcModelDescriptor.Host` is obsoleted and will not have any support.

12

Technical Summary of Changes for Creo 10.0.6.0

New Functions	31
Full Version of Creo.JS Release Notes.....	31

This chapter describes the critical and miscellaneous technical changes in Creo Parametric 10.0.6.0 and Creo.JS. It also lists the new and superseded functions for this release.

New Functions

This section describes new functions for Creo.JS for Creo Parametric 10.0.6.0.

Features

New Function	Description
pfcFeature.GetPatternByType()	Returns the pattern of the feature.
pfcFeature.PatternStatus	Returns the pattern status of the feature.
pfcFeature.GroupStatus	Returns the group status of the feature.
pfcFeature.GroupPatternStatus	Returns the group pattern status of the feature.

Full Version of Creo.JS Release Notes

To see a full version of the *Creo.JS Release Notes*, visit the page [Creo.JS Release Notes](#). The full version contains information from all the past release notes for Creo.JS.

13

Technical Summary of Changes for Creo 11.0.2.0

New Functions	33
Full Version of Creo.JS Release Notes.....	33

This chapter describes the critical and miscellaneous technical changes in Creo Parametric 11.0.2.0 and Creo.JS. It also lists the new and superseded functions for this release.

New Functions

This section describes new functions for Creo.JS for Creo Parametric 11.0.2.0.

Features

New Function	Description
pfcFeature.GetPatternByType()	Returns the pattern of the feature.
pfcFeature.PatternStatus	Returns the pattern status of the feature.
pfcFeature.GroupStatus	Returns the group status of the feature.
pfcFeature.GroupPatternStatus	Returns the group pattern status of the feature.

Full Version of Creo.JS Release Notes

To see a full version of the *Creo.JS Release Notes*, visit the page [Creo.JS Release Notes](#). The full version contains information from all the past release notes for Creo.JS.

14

Technical Summary of Changes for Creo 12.4.0.0

New Functions	35
Full Version of Creo.JS Release Notes.....	35

This chapter describes the critical and miscellaneous technical changes in Creo Parametric 12.4.0.0 and Creo.JS. It also lists the new and superseded functions for this release.

New Functions

This section describes new functions for Creo.JS for Creo Parametric 12.4.0.0.

Features

New Function	Description
pfcFeature.GetPatternByType()	Returns the pattern of the feature.
pfcFeature.PatternStatus	Returns the pattern status of the feature.
pfcFeature.GroupStatus	Returns the group status of the feature.
pfcFeature.GroupPatternStatus	Returns the group pattern status of the feature.

Full Version of Creo.JS Release Notes

To see a full version of the *Creo.JS Release Notes*, visit the page [Creo.JS Release Notes](#). The full version contains information from all the past release notes for Creo.JS.
